

CINCHSEAL CELEBRATES OUR
25th ANNIVERSARY

25
YEARS

CinchSeal Spices & Flavorings Solution Overview

For over 25 years, CinchSeal has been a global leader in manufacturing innovative rotary shaft seals that provide complete bearing and shaft protection on screw conveyors, ribbon blenders, mixers, and all types of bulk-processing equipment.

In harsh **Spices & Flavorings** environments, CinchSeal products make the need for processing equipment replacement far less likely as they solve problems associated with traditional lip seals and mechanical packing: prevent bearing failure, shaft damage, product leakage and loss, contamination, frequent cleaning, and unscheduled downtime and maintenance.

We serve world's top companies in every processing industry, ranging from food and beverage, pulp & paper, feed & grain, industrial, chemical, pharmaceutical, goldmine, cement, and others.

Value Proposition

Maximize Uptime

- Prevent product leaks, frequent repairs, and unscheduled downtime

Increase ROI

- Protect bearings and shafts from failure and damage and stop product loss due to leakage

Minimize Maintenance

- Take advantage of the split seal design and spend less time cleaning – without the need to take apart your processing equipment

Improve Productivity

- Keep your employees productive and operations running efficiently and smoothly

Reduce contamination risk

- Prevent cross-contamination, foreign material migration, and product recalls

Customer Pain Points

- Gearbox failure and frequent oil changes and replacement
- Shaft repairs
- Contamination risk
- Product loss
- Frequent maintenance
- No adequate housekeeping
- Safety concerns
- Unscheduled downtime

Type of Equipment

- Bucket Elevators
- Drive End Gear Reducers
- Extruders
- Mixers and Blenders
- Ribbon Blenders
- Rotary Air Valves
- Paddle Mixers
- Screw Conveyors
- Weight & Measure
