

CINCHSEAL CELEBRATES OUR
25th ANNIVERSARY

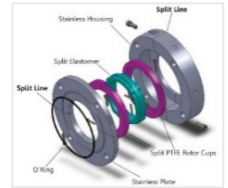

25
YEARS

CinchSeal Meat & Poultry Solution Overview

For 25 years, CinchSeal has been a global leader in manufacturing innovative rotary shaft seals that provide complete bearing and shaft protection on screw conveyors, ribbon blenders, mixers, and all types of bulk-processing equipment.

In such a sanitary processing environment as meat & poultry, CinchSeal products make the need for processing equipment replacement far less likely as they solve problems associated with traditional lip seals and mechanical packing: prevent cross-contamination, bearing failure, shaft damage, product leakage and loss, frequent cleaning, and unscheduled downtime.

CinchSeal's customers include Fortune 100 companies that have installed standard CEMA and custom-engineered shaft seals on processing equipment in industries, ranging from food and beverage to pharmaceutical, chemical processing, cement, and others.

BEFORE

AFTER

Value Proposition

Maximize Uptime

- Prevent cross-contamination, product leaks, frequent repairs, and unscheduled downtime

Increase ROI

- Protect bearings and shafts from failure and damage and stop product loss due to leakage

Minimize Maintenance

- Take advantage of the split seal design and spend less time cleaning – without the need to take apart your processing equipment

Improve Productivity

- Keep your employees productive and operations running efficiently and smoothly

Reduce contamination risk

- Prevent cross-contamination, foreign material migration, and product recalls

Customer Pain Points

- Gearbox failure and frequent oil changes and replacement
- Shaft repairs
- Contamination risk
- Product loss
- Frequent maintenance
- No adequate housekeeping
- Safety concerns
- Unscheduled downtime

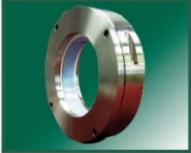

Type of Equipment

- Bucket Elevators
- Drive End Gear Reducers
- Extruders
- Mixers and Blenders
- Ribbon Blenders
- Rotary Air Valves
- Paddle Mixers
- Screw Conveyors
- Weight & Measure
